NORMAL TEMPERATURE OF ADULT 98° TO 100°.

AVERAGE PULSATION PER MINUTE:

At birth	130 to 140
Puberty	80 to 85
Adult	70 to 75
Old age	50 to 65

PROPORTIONS OF BLOOD.

Average weight of blood, in proportion to entire weight of body, is as 1 to 8, consequently the body of a man weighing 145 pounds will contain about 18 pounds of blood.

According to another authority:

Blood arterial, 15 to 20 pounds.

Proportion of arterial blood to venous, 4 to 9.

The average proportion of each organic element in 1000 parts of healthy blood, according to Le Cann, and MM. Andrae and Gavarret: fibrin, 3; red corpuscles, 127; solid matter of serum, 80; water, 790; but in inflammation the amount of fibrin may be increased to 10, and the albumen diminished, as in Bright's disease of the kidneys, etc.; and in fevers, etc., the fibrin diminishes in quantity.

DIMENSIONS OF ORGANS.

The average weight of each organ in the adult, according to Quain, is as follows:

Heart, male	11	ounces.
" female	9	"
Brain, male	49½	"
" female	44	"
