in E, No. 2 electrode on a very large sponge, placed over the external genitals in G, twenty minutes.

Third. No. 4 electrode across the small of back in H, No. 4 or 6 electrode across the lower abdomen in F, twenty minutes.

Fourth. No. 3 electrode on the spine, between the shoulders, in C, No. 4 electrode lower part of back, on the spine in F, twenty minutes.

Fifth. Administer the vapor-bath.

GONORRHŒA.

Have a small basin for the exclusive use of the patient, place the negative in the water and insert the end of the penis. The positive applied above the pubic region, or on the spine, or around the penis.

First. B–D continued for ten minutes.

Second. Then change to A–D or G–H, ten minutes.

A woman should receive similar treatment, only using the vaginal electrode.

Repeat once a day, or oftener, according to the urgency of the symptoms, and varying with other treatments, if needed, to meet special indications, as for fever, etc.

SYPHILIS.

Primary Ulcers.

Manipulate, if much inflamed as in gonorrhœa, taking care to submerge the affected portion of the surface. But in the more common indolent condition, whether of chancre or chancroid, a focalized manipulation is preferable. A small sponge may be
